PROFESSIONAL SUMMARY

Full-stack developer with 1+ years of professional experience in building scalable applications. Skilled in developing client-facing modules, real-time features, and collaborating with cross-functional teams to deliver efficient solutions.

EXPERIENCE

Software Engineer

Mar 2025 – Present

AAPGS Private Limited

Madurai, Tamilnadu

- Developed full-stack web applications using Angular/Next.js, Node.js, and MongoDB, delivering production-ready features end-to-end.
- Implemented real-time communication using Socket.IO and event-driven APIs to update UI based on live data changes.
- Designed and structured REST APIs and database models to support scalable and maintainable backend services.
- Collaborated with cross-functional teams across frontend and backend development to integrate APIs, real-time features, and user interfaces.

Web Developer

Dec 2024 – Feb 2025

E-Careerpluz Private Limited

Madurai, Tamilnadu

- Designed and developed a responsive business website offering digital services, consulting, and legal advisory.
- Built backend functionality using PHP to handle contact forms, subscription emails, and notifications.
- Created interactive user interfaces using HTML, CSS, and JavaScript to enhance user experience.

PROJECTS

Proflux IoT Management

AAPGS Private Limited

Angular, Node.js, MongoDB, Redis, Socket.IO, Gridster3, ECharts, FoblexFlow

- Designed a scalable IoT platform with multi-tenant architecture using dynamic database switching based on JWT authentication.
- Built a configurable dashboard system allowing users to create drag-and-drop dashboards with real-time ECharts and table widgets.
- Implemented user-level dashboard assignment, enabling admins to assign specific dashboards to each user.
- Optimized real-time data updates using Socket.IO and Map-based widget lookups for fast widget rendering.
- Implemented high-throughput data processing using Redis buffering, background workers, and MongoDB time-series collections.
- Reduced query latency by caching dashboard metadata in Redis with NX locks to prevent race conditions.
- Developed a visual automation engine using FoblexFlow enabling conditional workflows (HTTP, Email, WhatsApp) per device.

Keepwisely Asset Management

AAPGS Private Limited

Angular, Node.js, MongoDB, Socket.IO, Gridster3, ECharts, OLAMaps

- Developed Admin module for widget creation, enabling users to write JSON queries and map results to charts or tables, with validation and formatting using CodeMirror and Prettier.
- Implemented Client dashboard module with drag-and-drop support for dynamic rendering of assigned widgets.
- Integrated OLAMaps API to display asset locations, fetching coordinates from mobile clients and updating dashboards dynamically.
- Collaborated with Flutter developers to stream live video to Angular dashboards via WebRTC and Socket.IO.
- Added dynamic filtering and query-based data display for charts and tables to enhance dashboard usability and performance.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript

Frameworks: React, Angular, Next.js, Node.js, Express.js

Databases: MongoDB, Redis

Libraries / Tools: Socket.IO, ECharts, Gridster3, FoblexFlow, OLAMaps, WebRTC

EDUCATION

The Madura College

Madurai, Tamilnadu

Bachelor of Arts in Information Technology , CGPA : 7.61

Aug. 2021 – May 2024
